

eRAG

ChatGPT with your Operational Data. Just Ask!

GenAI tools like ChatGPT are transforming the way we get information.

But when it comes to **enterprise operational data**, they fall short: They don't understand the specific context of your enterprise data; they cannot interpret your data schemas; they struggle with consistency and accuracy.

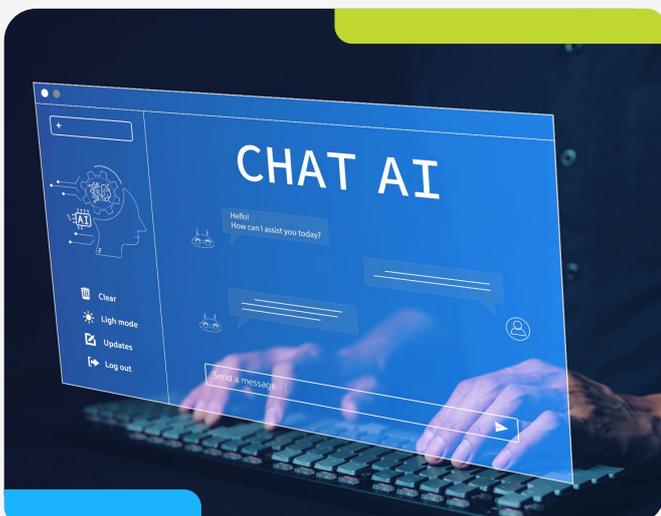

The result? You can't use GPT alone to make confident, real-time business decisions.

eRAG: The Power of ChatGPT with your Operational Data

eRAG combines the power of real-time operational data with ChatGPT's amazing user experience. With eRAG, you can get accurate consistent answers and carry out intuitive data exploration with your operational structured data.

eRAG gives you immediate answers visualized as graphs, tables, and summaries. It gives you insights and explores additional angles. It even uses AI agents to suggest actions, based on situational data analysis.

WHAT ERAG CAN DO FOR YOU!

THE FULL GPT EXPERIENCE – WITH YOUR OPERATIONAL DATA

- Enjoy the intuitive, conversational power of GPT, now grounded in your own data.

CONSISTENTLY ACCURATE

- Sophisticated semantic reasoning ensures correct, consistent answers.
- Built-in transparency shows how results are derived—building trust and confidence.

REAL-TIME RESPONSES

- Get the insights you need in seconds, not days.
- From sales to operations, act on live data to seize opportunities and mitigate risks.

EASY SETUP, FAST TIME-TO-VALUE

- No complex prep or data modeling required.
- Connect your data sources and start seeing results in weeks.
- Chat via ChatGPT, the eRAG chatbot or integrate into your AI platform.

eRAG: Your GenAI Data Partner

eRAG gives everyone in your organization—from IT leaders to frontline staff—the ability to easily engage with enterprise data in natural language, gain accurate insights instantly, and trigger actions when they matter most. With operational data at your fingertips, now is the time to change the way you work with data.
